SUMMARY

I'm a Front-end Developer experienced in building responsive web apps using Next.js, TypeScript, and Tailwind CSS. I'm expanding into back-end development with a focus on Node.js and RESTful APIs. I write clean, scalable code, adapt quickly, and thrive in remote, collaborative environments. I'm eager to contribute to freelance projects that push me to grow technically and professionally.

PROJECTS

ebooksunnah - Landing Page

A modern landing page offering free Islamic e-books based on authentic Sunnah.

- Live Demo : ebooksunnah.vercel.app
- GitHub : github.com/nuribnuu/ebooksunnah

findcinema - Movie Explorer App

An interactive platform to explore, discover, and save your favorite movies — all in one place.

- Live Demo : findcinema.vercel.app
- GitHub : github.com/nuribnuu/movie-explorer-app

findpoke - Pokedex App

A simple and fun app to search, explore, and view details of various Pokemon.

- Live Demo : findpoke.vercel.app
- GitHub : github.com/nuribnuu/pokedex-app

commercell - Ecommerce MVP App

A MVP simulation of an e-commerce app with essential features like product browsing, category filters, cart, checkout, and user authentication.

- Live Demo : commercell.vercel.app
- GitHub : github.com/nuribnuu/ecommerce-mvp-app
